

# Linea XS MACHINE FOR CUPS

## A MULTIFUNCTIONAL FILLER FOR MEDIUM OUTPUTS

### Filling and sealing

- Uncompromising hygiene
- Simplified & compact design
- Maximum ergonomics

**Containers:** Round pre-formed cups from 50 to 180 mm in diameter and rectangular up to 200 mm x 130 mm

**Materials:** PET, PP, PS, aluminum glass, cardboard, ...

**Work-rate:** From 3000 to 12000 cups per hour

## About the LINEA XS machine

The LINEA XS incorporates our latest advances in terms of hygiene, ergonomics and flexibility in a refined design that makes installation and daily operation easier.

## Technical characteristics

**A wide choice of functions to be incorporated according to your needs**

- De-stackable cups dispensing or non de-stackable cups introduction
- Cup presence monitoring
- Filling (up to 3 filling stations)
- Dispensing of aluminum or plastic foil capsules or sealing from a plastic roll
- Capsule presence detection
- Heat-sealing
- Dating
- Discharge on conveyor

## Markets

### Dairy products

### Food products

# Advantages

## Uncompromising filling hygiene

The LINEA XS guarantees environmental control through a unidirectional laminar flow installed above filling operations.

It can be combined with UV, pulsed light or H<sub>2</sub>O<sub>2</sub> decontamination modules, depending on the level of bacteriological reduction required and the environmental goals aimed at.

It also benefits from a new electric dosing nozzle developed by Serac, which is cleaner and more versatile.

## Simplified and compact design for better TRS

The LINEA has a design that combines simplicity, efficiency and scalability. From mechanical drives or servomotors to stations that can be moved as needed, with a reduced footprint, the LINEA XS is designed to offer a flexible and a reliable production tool.

## Maximum ergonomics for the operator

With a lowered chassis, storage stations within arm's reach and a design that provide increased visibility on the filling functions, the LINEA XS offers true working comfort to the operator in charge of running it.

# Options

- Pre or post filling
- Maintain the temperature of the product circuit
- Lid fitting
- Crimping
- Ink jet coding
- Laminar airflow
- Container decontamination module
