HOW SeQR DOC WORKS?

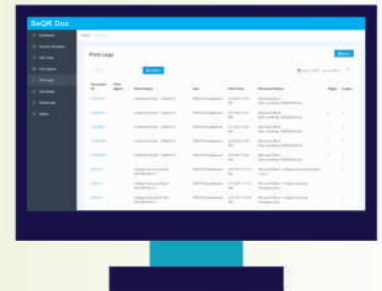

CREATE

- Start with blank document or upload your existing design.
- If you don't have own document design, then we can design it for you.
- The document can be of any custom size. You can also use standard sizes like A3, A4, A5, Letter & more.
- The document orientation can be either portrait or landscape.

SECURE

- Design a base template on SeQR Doc and add security features from the option available to make your document secure.
- Certificates are generated using high security digital personalization. You can generate your certificates in your own secure area of our portal.
- We will validate your design and upload a secure version ready for you to use in your library.
- Using our step-by-step guide, uploading your data on to the system for the production of individual document is easy.
- You can use SeQR Doc base stock paper which is secured using Paper, Design & Print Security.

SEND / PRINT

- Review and approve your documents online. When they are ready, you have multiple options:
- You can email your documents to the person/party direct from the portal
- You can print the document yourself using SeQR Doc base stock paper supplied by us or on your own paper stock.
- We can print the certificates at our own premises and deliver them back to you.

WHY SeQR DOC ?

- SeQR Doc is an online web portal which enables organization to **create, print and send** secure certificates using a simple self-service facility.
- SeQR Doc brings advanced **anti-counterfeit technology** to you in a simple to use self-service platform.
- SeQR Doc provides firm authenticity & security approach to combat against document fraud & alteration.
- SeQR Doc provides secure **validation & verification from anywhere in the world.**
- Whether issuing traditional paper secure or digital document, SeQR Doc provides a

bespoke platform, built around your processes, with **automation and compliance** at its heart.

- Easy, User Friendly, High Security, High Performance Solution for Document Security.
- A complete & proven solution for document protection in print as well as digital format.

**MORE SECURE, TO ENSURE...
MORE RELIABLE, TO PROCURE...
LESS DOUBT, MORE FAITH...
WITH SeQR DOCS.**

SECURING BASE STOCK

“We have the most comprehensive range of security print features available to provide bespoke, innovative and technological solutions to combat forgery and counterfeiting.”

SECURED BASE PRINT

Along with secured design, we add following security features while printing the base paper stock.

HOT FOIL STAMPING

THERMOCHROMIC INK

FLUORESCENT INK

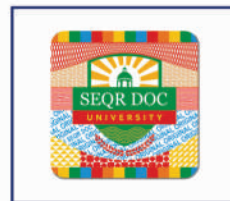

CONDUCTIVE INK

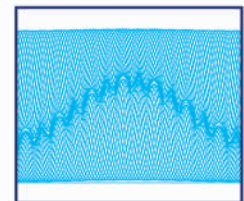

WATERMARK LOGO

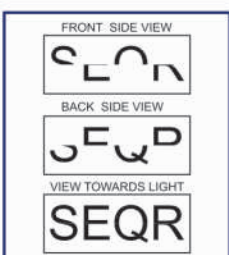

INVISIBLE UV INK

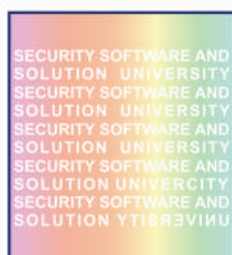

HOLOGRAM

RED FILTER TEXT

SEE THROUGH IMAGE

PRISMATIC PRINTING

SERIAL NUMBERING

SECURING DATA

SeQR Doc software converts data into security features and generates highly secure file for printing and digital cloud storage. Using SeQR Doc any combination of variable data can be converted into different security elements.

SECURED DATA

SeQR Doc enables digital personalization of data into following security features.

Encrypted QR Code

SeQR Code enables digital verification with a smartphone to quickly confirm the authenticity of a document. Our proprietary QR code is encrypted, via a hashed algorithm, which prevents unauthorized users from scanning the code and makes counterfeiting impossible.

Regular QR Code

This QR code can be read by any QR reader and can display set of information from personalized data of issuing authority and document holder.

Barcode

Our secured barcode contains data regarding the printing history of the document.

ELON JOBS
MASTER OF ENGINEERING
IN COMPUTER SCIENCE
CGPA 9.84 GRADE A

Personalized Invisible UV Text

Strengthen copy prevention with Personalized Invisible UV Text. Any combination of personalized data can be printed with security UV inks.

Personalized Invisible UV Image

Similar to text, add personalized invisible UV image of the document holder on each of the document.

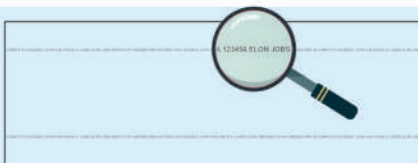

Personalized Watermark Security Line

Watermark security line is a unique way of printing variable personalized data. Data is printed diagonally across the document or on selected part. This anti-tampering watermark helps to easily verify a document's authenticity.

Variable Ghost Image

This feature creates additional layer of security by placing variable text in coded structure so that it can only be visible under a filter.

Variable Micro Text

This feature provides secondary means to verify a documents authenticity by injecting variable data into traditional Micro Lines.

SECURED DEPOSITORY

- Data stored in ISO certified Data Centers with regulatory compliance.
- Secured cloud platform with 256bit SSL and hashed encryption algorithm.
- Documents are stored digitally and available to authorized people 24x7.
- Online, Quick & Reliable verification of documents after authentication can be enabled using Secured Depository.
- Disaster recovery and backup enabled.

VERIFICATION

Mobile & Web App for Verification

Along with SeQR Doc software, we provide verification tool using android and ios mobile app and a web app to be linked to website of that organization.

Data verification through Encrypted QR Code with Private Key

Encrypted QR code can be read only through organization's mobile app by registered users. It enables quick digital verification and prevents unauthorized users from scanning the code and makes counterfeiting impossible.

Track & Trace through DNA Barcode

DNA barcode enables tracking & traceability for internal audit purpose. It contains important information about each print job including who, when and where a document was printed.

Entering Serial Number or Identification Number

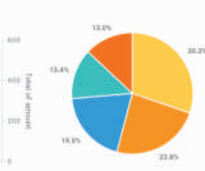

Online verification can also be done on the website by entering unique identifier number.

Online Payment for Verification

If and organization wants to charge for verification then it can be easily enabled by integrating payment gateway.
